

ROC-AUC Comparison with Error Bars (mean $\pm$ SD over 5 seeds)

P1: Image-level (leaky) P2: Subject-independent (leakage-free) Cross-cohort (external validation)

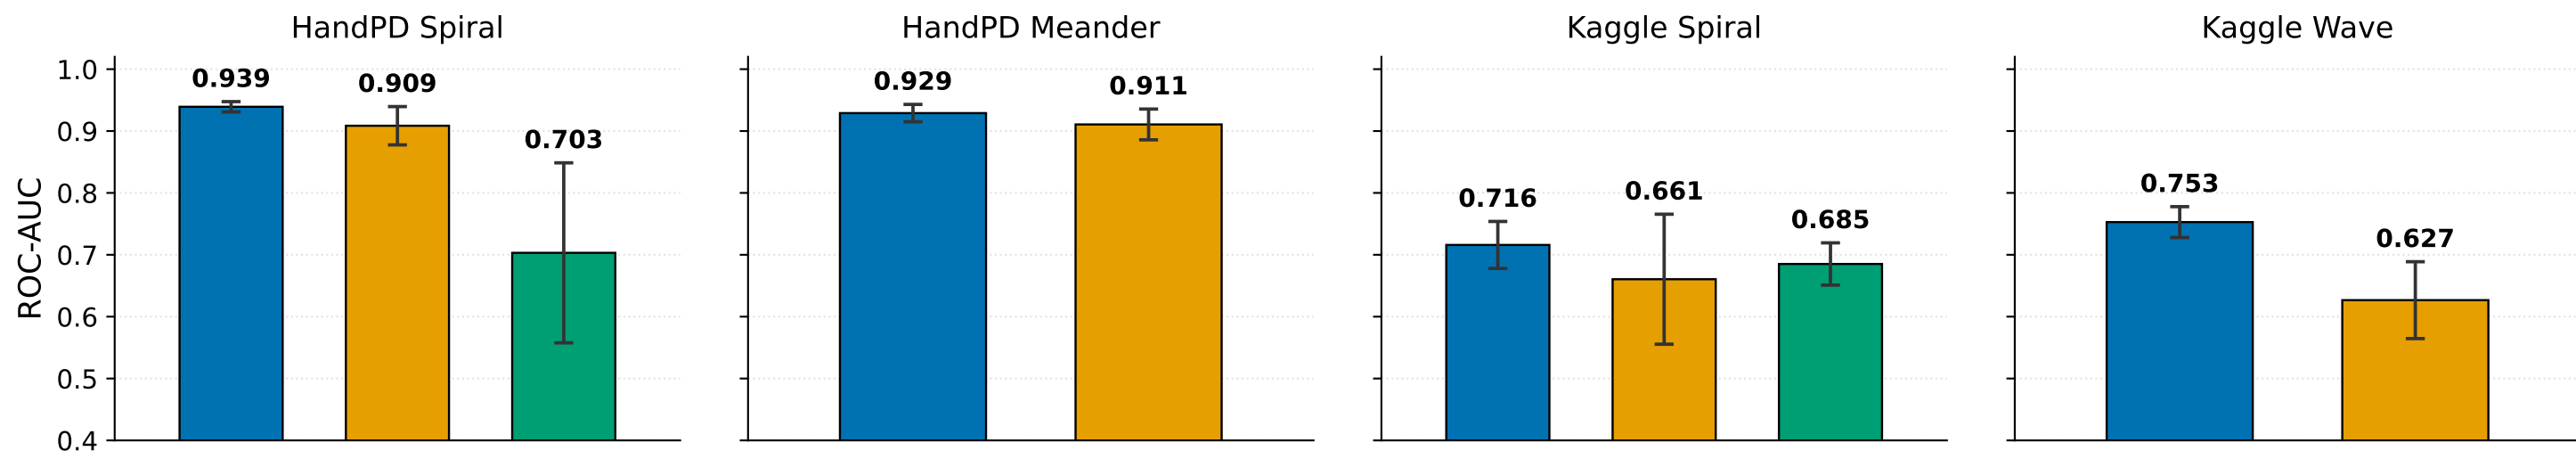

(A) VGG-16

(B) ResNet-50

(C) EfficientNet-B0

P1: Image-level random k-fold CV (same subject may appear in train and test) | P2: Subject-grouped k-fold CV / LOSO (no subject overlap)

Cross-cohort: Train on one cohort, test on the other (HandPD $\leftrightarrow$ Kaggle)

Error bars: mean $\pm$ SD over 5 random seeds
